All ILC products must only be used for their intended purposes, as specified in this brochure and in all instructions. If the product is supplied together with user instructions, the user is required to read them and comply with them. Not all lubricants are suitable for centralised lubrication systems. ILC lubrication systems or relative components cannot be used together with gas, liquid gas, pressurised gas in solution and liquids with vapour pressure exceeding normal atmospheric pressure (1013 bar) by more than 0.5 bar, maximum temperature permitted. Any type of dangerous materials, in particular those classified as such by European Community Directive (EC) 67/548/EEC, Article 2 (2), can only be used in ILC centralised lubrication systems or relative components upon consultation with ILC and after having received written approval from the company.

Technical data

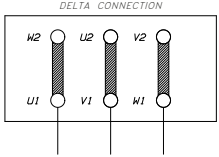

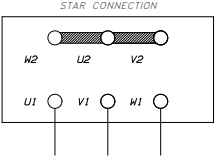

Flow rate/1'	150 CC - 250 CC - 500 CC
Operating pressure	50 - 120 bar adjustable
Tank	4 - 5 - 6 - 8 - 12 - 50 L
Lubricants	Oils from 50 to 1000 cSt 40° C
Delivery fitting	M12x1 Pipe Ø 6 - 8
Operating temperature	from -20° C to +80° C
Minimum electric level	1.5 A - 250 V AC / 200 V DC - 50 W

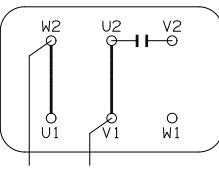

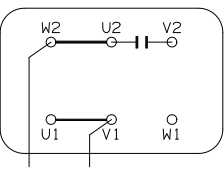

Motor

MPO series electric pumps have a standard configuration that has a three-phase multi-voltage motor. The pump motor unit is applied to a sheet-metal angle plate acting as a cover of the tank

For orders with motors of different voltages, add the voltage value to the relative code, for example **00.860.0** becomes **00.860.0.115**.

Three-phase			General features	
Power supply voltage	Frequency	Absorption	Power	0.18 kW
220-240/380-420	50 Hz	1.05-1.22/0.63-0.71 A	Protection rating	IP55
254-280/440-480	60 Hz	1.05-1.22/0.63-0.71 A	Service	Continuous S1

MPO

MPO electric pumps are intended for the provision of oil lubrication systems where progressive dividers are installed.

A valve unit, which provides priming and bypass functions, is applied to the gear pump. They are also equipped with electric minimum level indicator, pressure switch, filler cap with filter and intake filter. Their high pressure and flow rate performance allow them to be used in medium and large size systems.
